Overview

These slides introduce *IoT and connected products*.

Definitions, main use cases and how it works.

What becomes possible, good and bad.

Internet of Things (IoT)

Small, connected computers with sensors, actuators.

"Physical objects with a Web API." — @hansamann

IoT: "Global network of computers, sensors and actuators, connected through Internet protocols."

Web of Things: "RESTful Web services that measure or manipulate physical properties." — @gsiot

Ubiquitous computing

"The idea of integrating computers seamlessly into the world at large [...] *Ubiquitous computing*"

"How do technologies disappear into the background? The vanishing of electric motors may serve as an instructive example" e.g. in escalators or in a car.

— Mark Weiser in The Computer for the 21st Century

Connectivity

Transmit data at room, building or city scale.

Personal area network, e.g. BLE, Zigbee, ~30 m.

Local area networks, e.g. Ethernet, Wi-Fi, ~100 m.

Wide area networks, e.g. 5G, LoRaWAN, 2 to 20 km.

Use Cases

Efficiency, e.g. trash bins let you know they are full.

Convenience, e.g. remotely preheat a holiday home.

New insights, e.g. a crowdsourced air quality map.

Sectors include connected consumer products, citizen sensing, industrial IoT and many more.

Connected products

Internet-connected consumer products.

Philips Hue, connected lights with a Web API.

Withings Scale, logs your weight to a dashboard.

Good Night Lamp, linked lamps to share presence.

Smart lights
Smarter controls

Philips Hue is not just a smart bulb, it's a smart lighting system. The smart lights, Hue Bridge, and smart controls will forever change the way you experience light.

Hue lights

These smart and energy-efficient LED lights come in a wide variety of shapes, sizes, and models to suit your space.

Hue Bridge

The heart of your Philips Hue system, the Bridge acts as a smart hub, connecting your devices to your smart lights. You can add up to 50 Philips Hue lights and accessories to one Bridge.

Hue app

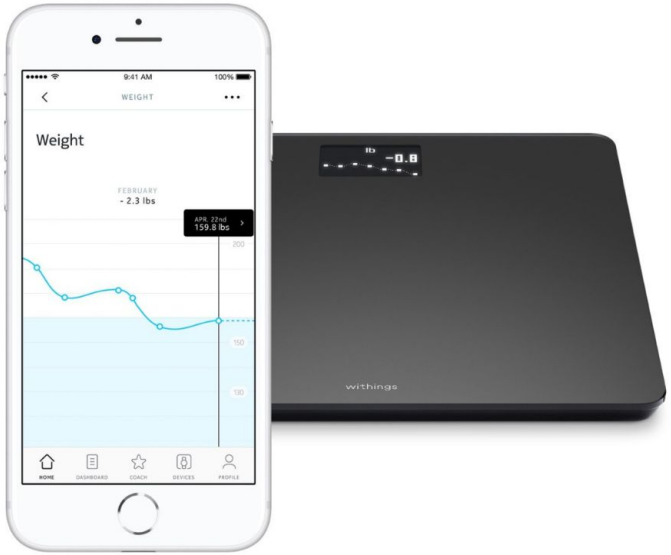

Control your smart lights quickly and conveniently with the Philips Hue app.

Weight & BMI Wi-Fi Scale - Bo

https://www.withings.com/us/en/body

Meet your new accountability partner

Body offers a complete weight tracking experience tailored to individuals seeking easy, effective weight management. Weighing in is just the first step. Each session also provides instant feedback via weight trend and BMI screens, plus automatic sync to a free app on your smartphone, so you can track progress any time, anywhere.

goodnightlamp.com

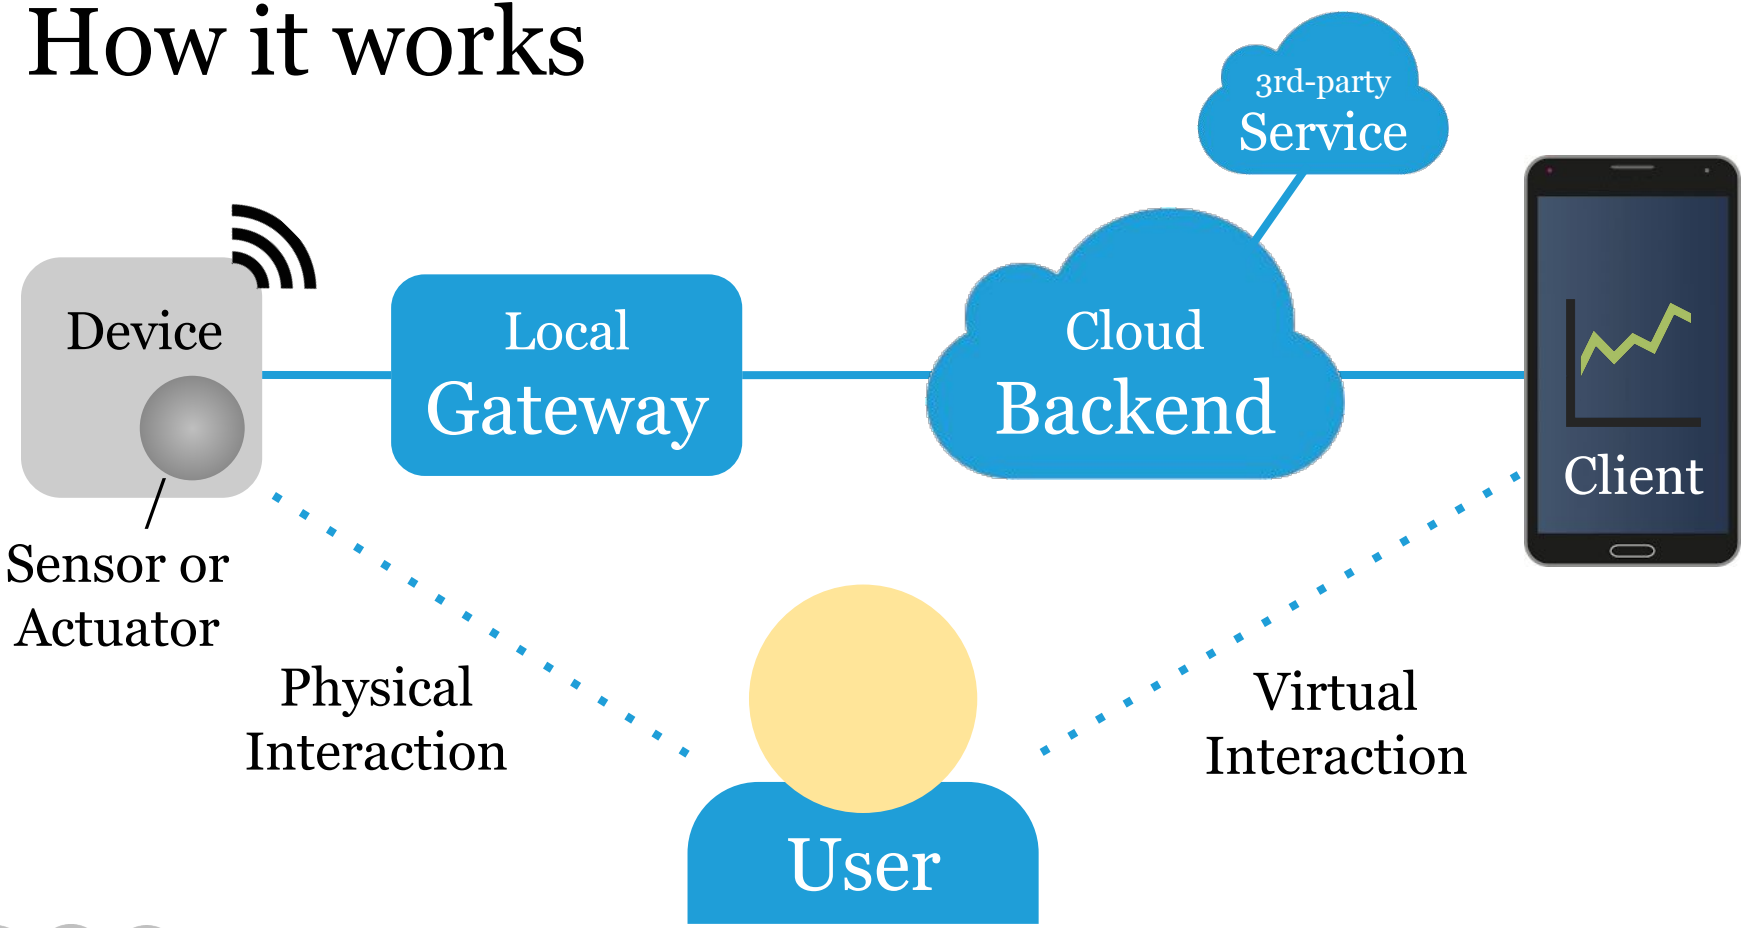

Not Secure | goodnightlamp.com

Turn a Big Lamp on and Little Lamps which you've given away turn on too. Anywhere in the world.

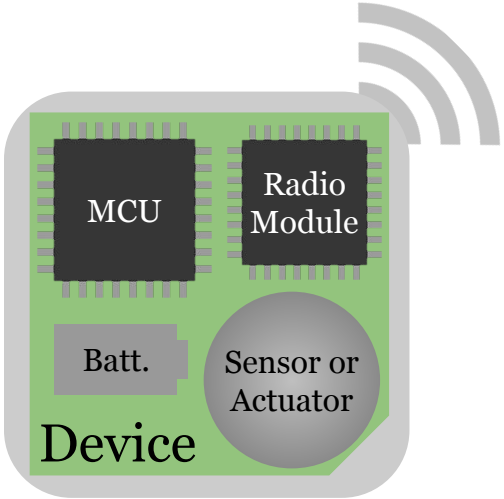

Use the Good Night Lamp to tell a loved one 'now's a good time for a chat', 'I'm thinking of you' or 'call me when you get home'. You decide. As your family grows or moves away, you can add as many Little Lamps as you want.

What's inside

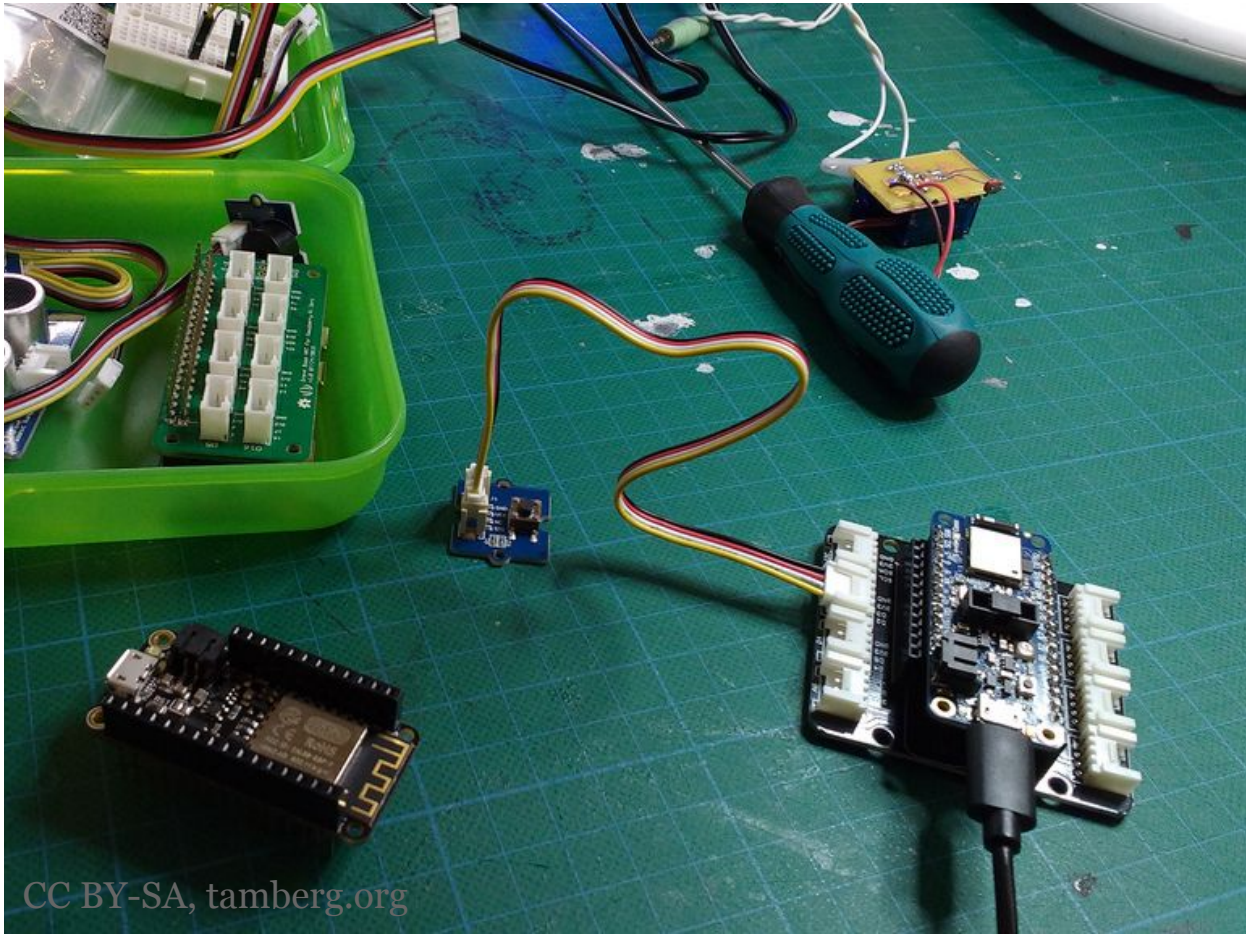

Proto-typing

Use modular, open source hardware.

E.g. Feather and Grove.

From prototype to product

Hardware prototypes are easy, products are hard.

Engineering, to make electronics smaller, low power.

Design for manufacturing, to reduce cost per piece.

Scale up from 100 to 1000 to 10k per batch, learn.

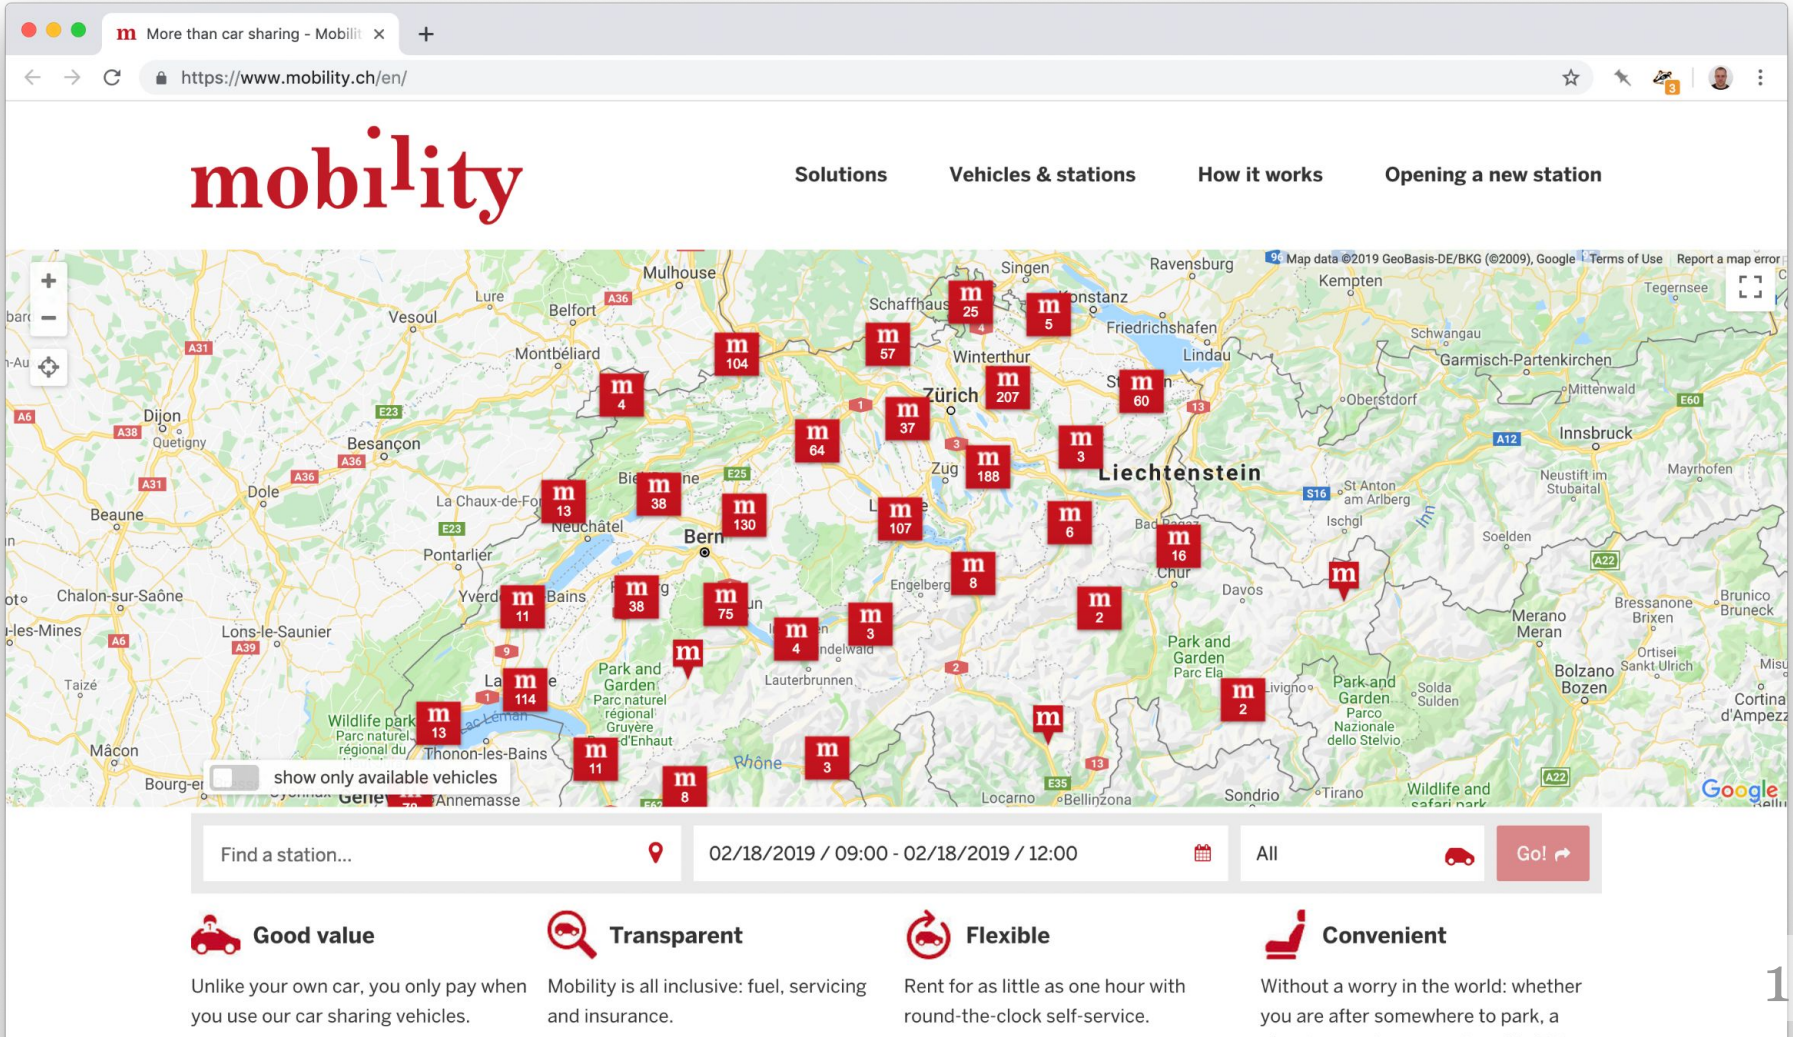

From product to service

Each connected product represents a service.

Philips Hue lights for "smart lighting".

Kindle reader to "never be without a book".

Withings smart scale as "accountability partner".

Better IoT

Security, to keep devices, network & backend secure.

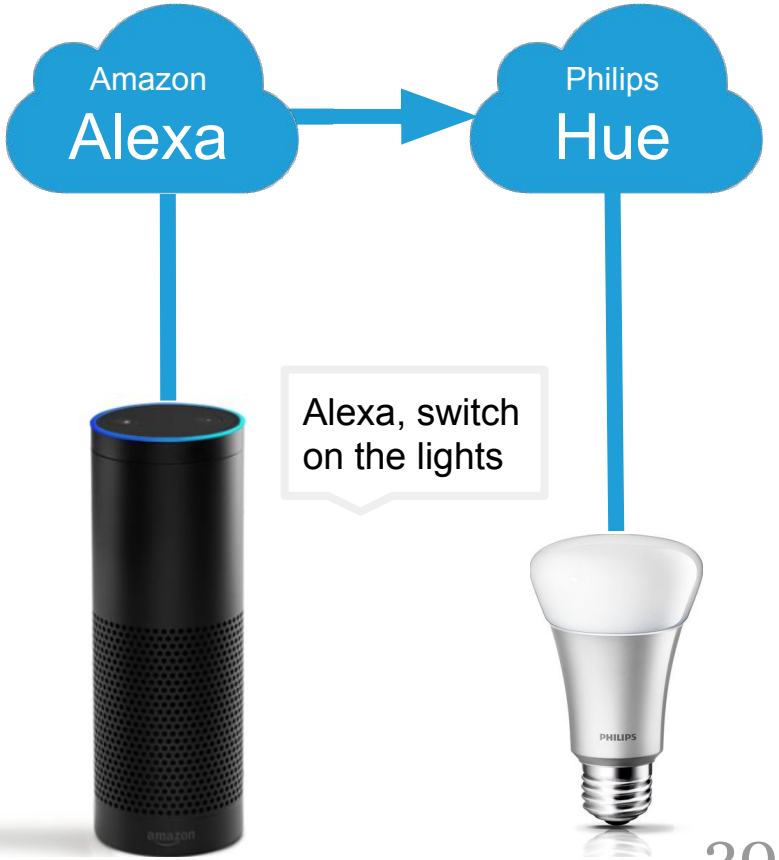

Privacy, to keep people in control of their own data.

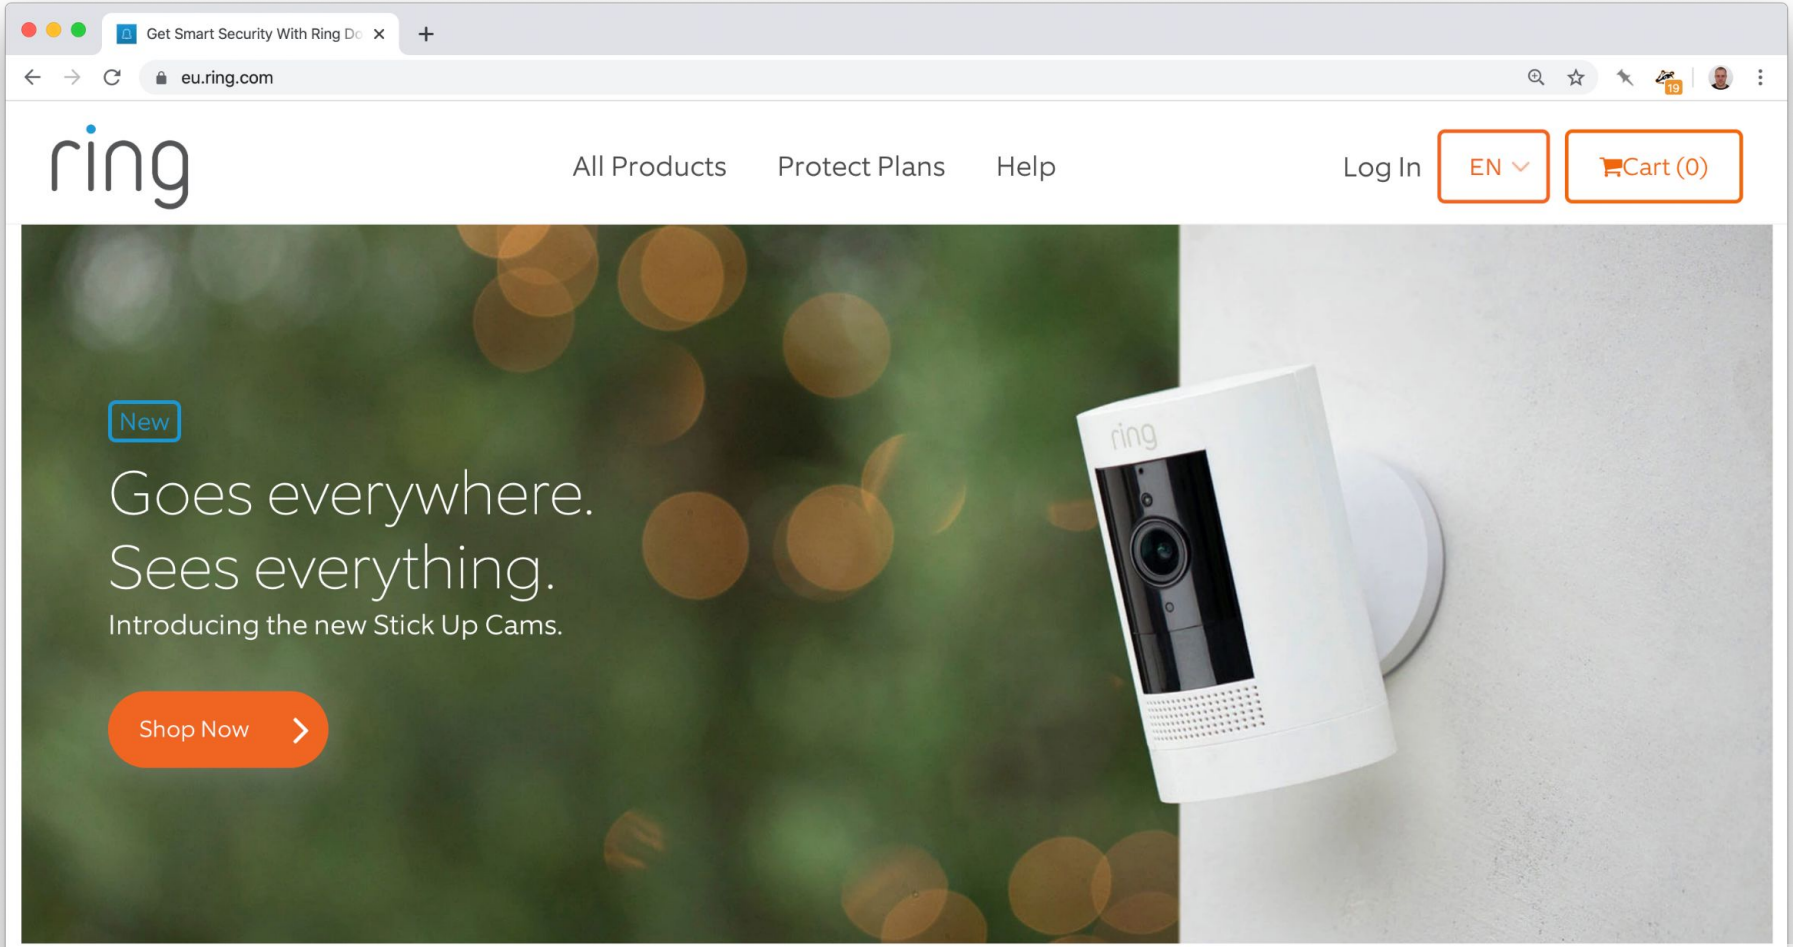

Interoperability, to become part of an ecosystem.

Openness, standards & open source build trust.

See, e.g. betteriot.org principles and wiki.

Amazon's helping police build

cnet.com/features/amazons-helping-police-build-a-surveillance-network-with-ring-doorbells/

Amazon's helping police build a surveillance network with Ring doorbells

Its popular Ring smart doorbells mean more cameras on more doorsteps, where surveillance footage used to be rare.

BY ALFRED NG | JUNE 5, 2019

ROBERT RODRIGUEZ

If you're walking in Bloomfield, New Jersey, there's a good chance you're being recorded. But it's not a corporate office or warehouse security camera capturing the footage -- it's likely a Ring doorbell made by Amazon.

While residential neighborhoods aren't usually lined with security cameras, the smart doorbell's popularity has essentially created private surveillance networks powered by Amazon and promoted by police departments.
